**DATE :** July 2<sup>nd</sup>, 2019

**SUBJECT :** Froglegs Forks

---

Dear Motion Composites Dealers,

Good news! Motion Composites will now maintain stock for the Froglegs Forks caster shock absorber which were previously on special order only, meaning faster turn-around time for this component. The model in stock will be the new Phase 2 model made of carbon fiber, replacing the Phase 1 model made of aluminum. The new Phase 2 model is lighter and provides superior shock absorption. The v4.8 order forms have been modified to accommodate this change. Applicable on all Motion Composites wheelchairs except the Move.

## New Phase 2 Model

## Previous Model

---

Thank you for your understanding.

William Neale
