## CENTER OF GRAVITY

### Choose position of rear wheel axle plate:

Measure distance X from front of back post to center of axle receiver.

| Most stable              |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
